Full Stack Developer (React / Next.js / Node.js)

Full stack developer with 1+ year building production software. I built Relevy (relevy.app) end to end: 46,000 lines, 1,119 tests, 21 sprints, public code on GitHub. Frontend with React 19 and Next.js 15, backend with Node.js, database in PostgreSQL. Before that, EchoLog, a multi-tenant system with 606 tests. I work with REST APIs, Git, CI/CD and agile methodologies. I use AI daily as a development tool, with critical review of generated code and tests backing every delivery. Systems Analysis student.

Projects

Relevy - GEO/SEO Auditing SaaS

[Live](#) · [Repo](#)

SaaS in production. Next.js 15, React 19, TypeScript, PostgreSQL. 1,119 tests, CI/CD.

- Designed the full interface with React 19 and Next.js 15 (App Router, Server Components) plus a 16-component design system with Tailwind CSS 4
- A mobile drawer broke the SSR of the whole app: the portal mounted before client mount and I fixed it by conditioning it
- Built 6 custom analysis engines and the scoring in TypeScript, with REST APIs, auth (GitHub OAuth), rate limiting and SSRF protection
- Wrote 1,119 tests (unit, integration, E2E, accessibility with axe in a real browser) and calibrated scoring against 14 real URLs
- 21 sprints with SDD methodology and code reviews at each stage

EchoLog - Customer Feedback SaaS

[Demo](#) · [Repo](#)

Multi-tenant system in production. React 19, TypeScript, Node.js, PostgreSQL. 606 tests, CI/CD.

- Built ~60 reusable components with React 19 and TypeScript across 16 routes
- Wrote REST APIs with validation (Zod); tenant isolation lives in the PostgreSQL schema, not the frontend
- Wrote 606 tests (unit, integration, E2E) and ~45 PRs with code reviews over 18 phases

Technical Skills

Frontend: React 19, TypeScript, Next.js 15, HTML5, CSS3, Tailwind CSS 4, TanStack Query, Zustand, React Router 7 **Backend:** Node.js, Express, REST APIs, PostgreSQL, Prisma ORM, SQL **Cloud:** AWS (EC2, S3, Lambda, DynamoDB, RDS, CloudFront, API Gateway) **AI in development:** AI coding agents, critical review of generated code, prompt engineering **Tools:** Git, GitHub, GitHub Actions (CI/CD), Vercel, Sentry, Docker (concepts) **Testing:** Vitest, React Testing Library, Playwright (unit, integration, E2E), TDD **Methodology:** Agile (Scrum, sprints), SDD (Spec-Driven Development)

Education

Systems Analysis - Da Vinci, Primera Escuela de Arte Multimedial

2025 - present

Certifications

Data Analytics with Python - Talento Tech (GCBA)

2026 - in progress

AWS Fundamentals: Cloud, Serverless and Operations - Commit Academy

2026 - completed

English C2 - EF SET

2026 - cert.efset.org/8Ng7nC

AI Development: 0 to Production - BIG school

2026 - completed

Availability: Immediate · Full Time · Remote / Hybrid / On-site (Buenos Aires) · Portfolio:
