Full-Stack Developer - React / Node.js

React 19 · TypeScript · Node.js · Express · PostgreSQL · Prisma · Tailwind CSS 4 · TanStack Query · Vitest · Playwright

Systems Analysis student with hands-on experience building and deploying two production-grade SaaS applications. Strong focus on clean architecture, automated testing, CI/CD, and secure coding practices. Advanced English.

Projects

EchoLog - Multi-tenant Customer Feedback SaaS

[Demo](#) · [Repo](#)

Production SaaS platform for customer feedback built with React 19, TypeScript, Node.js/Express, and PostgreSQL. 18 development phases, ~45 merged PRs, ~20k lines of code.

- Screaming architecture with 9 business domains and 34 shared Zod schemas as the single source of truth between frontend and backend.
- JWT authentication in httpOnly cookies (manual HMAC-SHA256, zero dependencies), RBAC with 4 roles, rate limiting, explicit CSP, and server-side input sanitization.
- RESTful APIs with Express, Zod validation on every input, structured logging with Pino, and global error handling.
- Server state with TanStack Query, optimistic UI with automatic rollback on votes and comments. UI state with Zustand.
- 606 automated tests (Vitest, React Testing Library, Playwright E2E), CI/CD with GitHub Actions, deployed to Vercel + Render + Supabase.
- Public workspaces with 3 access levels, email invitation system, in-app notifications, and board approval flow.

Nexus Talent - AI-Powered Recruitment Platform

[Demo](#) · [Repo](#)

AI-driven recruitment SaaS that analyzes job descriptions and generates tailored CVs. 17 phases, 272 commits.

- Server-side AI proxy with Groq (LLaMA 3.3 70B): API key never reaches the browser, 90s timeout, Zod response validation, errors return 502 Bad Gateway (no internal leak).
- Custom JWT with zero dependencies (crypto.createHmac) + manual Google OAuth without Google SDK. httpOnly cookies for XSS protection.
- AI-powered CV Generator: merges work experience, education, and profile, exports to .md/.html/.pdf with @react-pdf/renderer. Drag-and-drop section ordering with @dnd-kit.
- 470+ tests (Vitest + React Testing Library + Playwright E2E), CI/CD with GitHub Actions, deployed to Vercel + Render + Supabase.
- Strict TDD with forBitOnly in CI. Every PR follows RED → GREEN → REFACTOR cycle.

Skills

Frontend: React 19, TypeScript, JavaScript (ES6+), Tailwind CSS 4, HTML5, CSS3, Vite, TanStack Query, Zustand, React Hook Form, Framer Motion **Backend:** Node.js, Express.js, REST APIs, JWT, Prisma ORM, Zod, Pino, pnpm monorepos **Database:** PostgreSQL (schema design, queries, migrations with Prisma), SQLite **Testing:** Vitest, React Testing Library, Playwright (E2E), supertest, TDD **DevOps:** Git, GitHub Actions (CI/CD), Vercel, Render, Supabase **Architecture:** Screaming Architecture, modular design, reusable components, WCAG 2.2 AA, responsive mobile-first design **AI Tools:** OpenCode/SDD, Claude Code, GitHub Copilot
