Full-Stack Developer

React 19 · TypeScript · Node.js · Express · PostgreSQL · TanStack Query · Zustand · Tailwind CSS 4

Full-stack developer with experience building complete web applications - architecture, database, API, UI, testing, and deployment. Passionate about maintainable code, automated testing, and web accessibility. Experienced integrating AI APIs and using AI tools as part of the development workflow. Advanced English for remote work with international teams.

📁 Projects

EchoLog - Multi-tenant Customer Feedback SaaS

[Demo](#) · [Repo](#)

Full-stack multi-tenant SaaS - React 19, TypeScript, Node.js, Express, PostgreSQL with Prisma.

- Monorepo with pnpm workspaces (server/web/shared) and shared Zod contracts - breaks at compile time if frontend and backend drift apart
- Backend with screaming architecture: domain folders (auth, boards, posts, votes, comments, workspaces, notifications) with controller/service/router layers
- JWT authentication with httpOnly cookies and role-based authorization middleware (Owner, Admin, Member, Viewer)
- PostgreSQL with composite keys for multi-tenant isolation, 8+ models with complex relations
- 78+ automated tests (Vitest + React Testing Library + Playwright E2E) running in CI via GitHub Actions
- WCAG 2.1 AA accessibility complete: skip links, focus management, live regions, prefers-reduced-motion - 20 tasks

Nexus Talent - AI-assisted Recruitment Platform

[Demo](#) · [Repo](#)

Web app built with React, TypeScript, and Tailwind CSS 4 that transforms job descriptions into skill matrices using AI.

- AI orchestration layer with Groq as primary provider - retries, timeouts, and error normalization
- Zod validation on both user input and AI responses - invalid data never reaches the UI
- Social auth with Supabase (Google + GitHub), responsive UI, and continuous deployment on Vercel

Movie Management Dashboard

[Demo](#) · [Repo](#)

CRUD SPA with React, TypeScript, and Supabase - Row Level Security and automated testing.

- TanStack Query caching (stale-while-revalidate, optimistic updates) - instant UI response with background sync
- React Hook Form + Zod for validated forms, Supabase RLS for per-user data isolation
- Unit and integration tests with Vitest and React Testing Library

🛠 Skills

Frontend: React 19, TypeScript, JavaScript, Tailwind CSS 4, TanStack Query, Zustand, React Router 7, React Hook Form, Framer Motion, Vite, HTML/CSS · **Backend:** Node.js, Express, REST APIs, JWT, PHP (basic) · **Database:** PostgreSQL, Prisma ORM, SQL, Supabase · **Testing:** Vitest, React Testing Library, Playwright · **DevOps:** Git, GitHub Actions, CI/CD,

Vercel · **Architecture:** Screaming Architecture, feature-based, Zod contracts, WCAG 2.1 AA, monorepo · **AI:** AI agents for development, SDD, AI API integration (Groq, Google) · **Languages:** Spanish (native), English (advanced)

 Education

Systems Analyst - Da Vinci University	2025 - present
Cybersecurity Professional Certificate - IBM SkillsBuild	2026 - present
AI Development: 0 to Production - BIG school	2026 - completed
Languages: Spanish (native) · English (advanced)
